Explore / desktop

Travel-journal visual identity and a real external destination API.

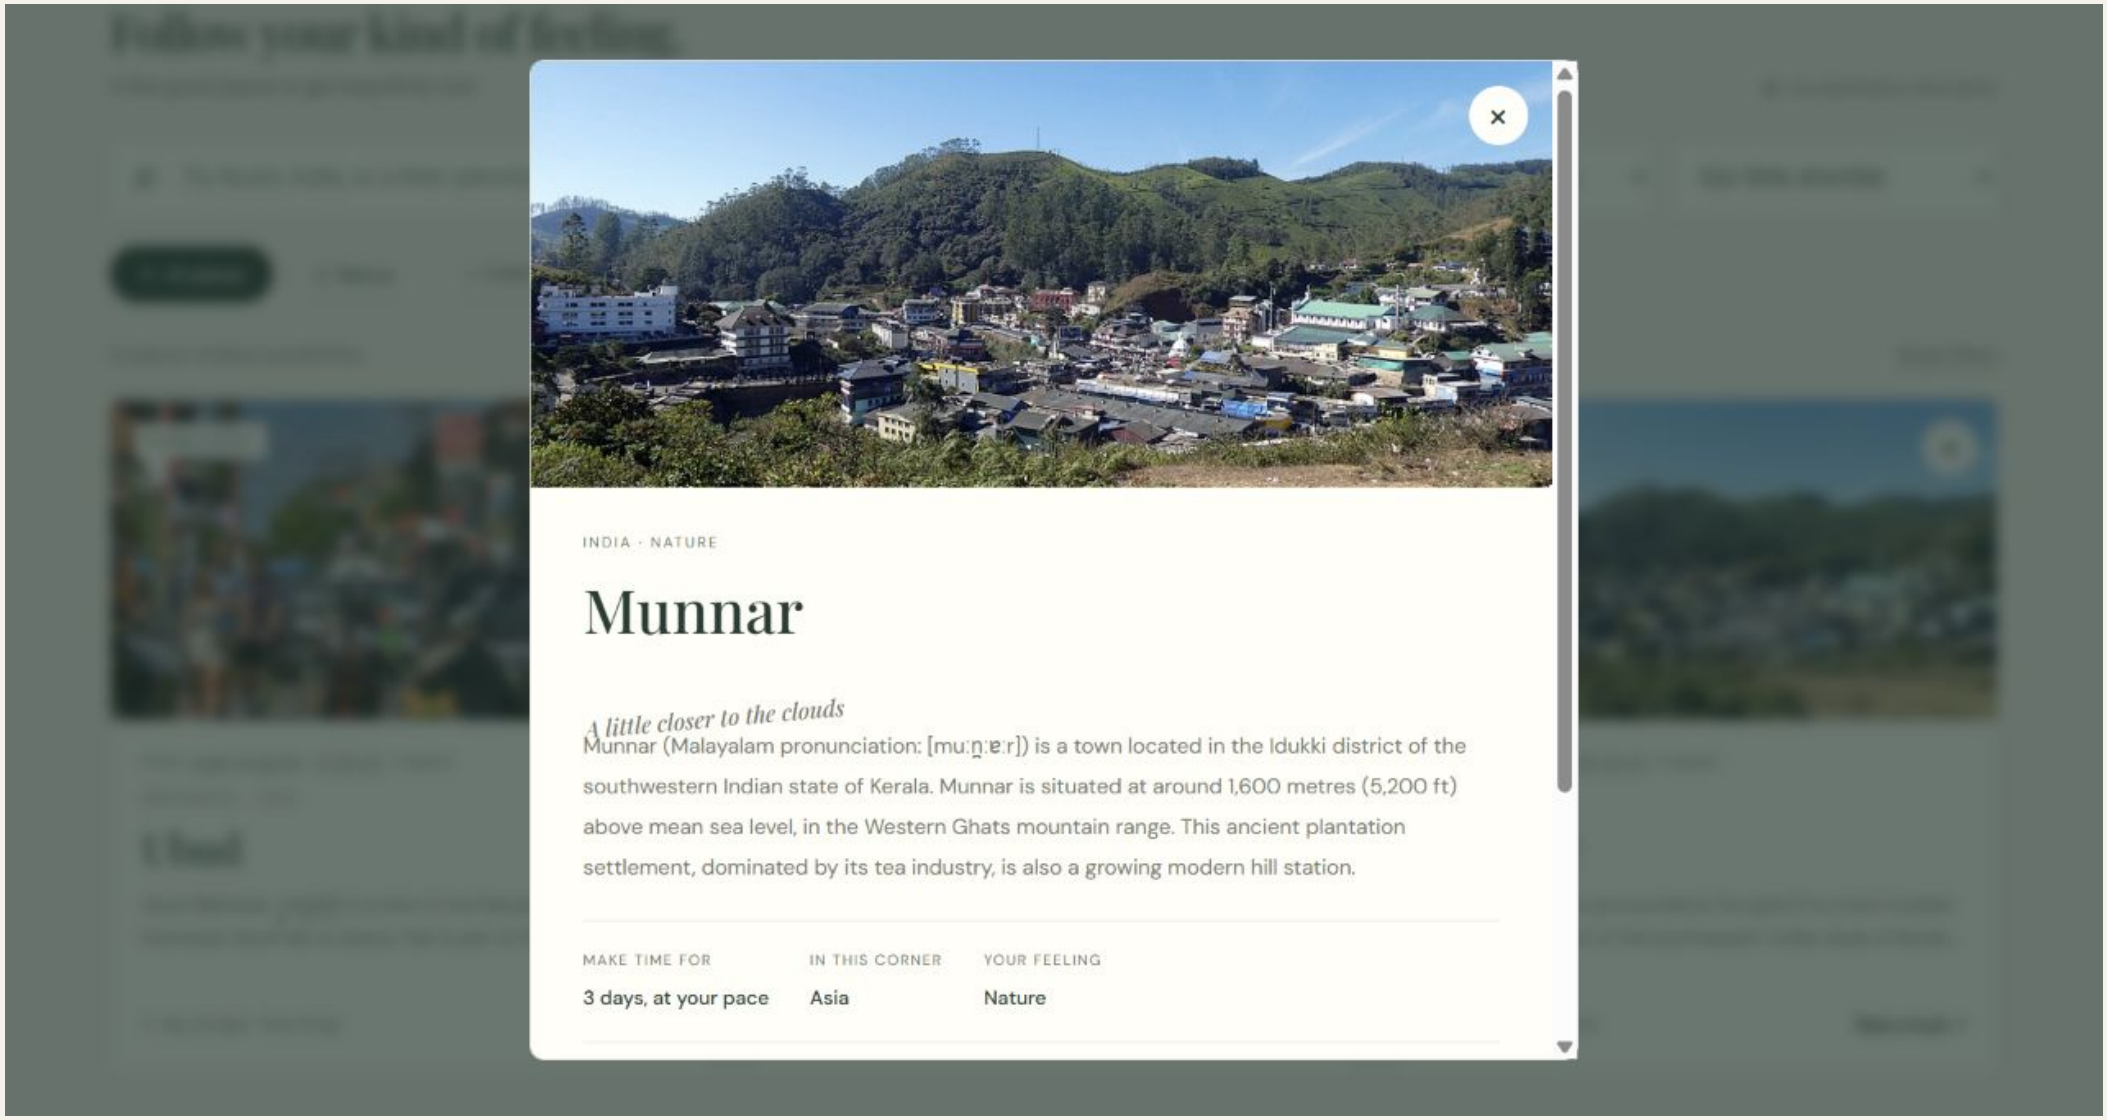

Destination discovery

Live place photographs and descriptions, with collect and details actions.

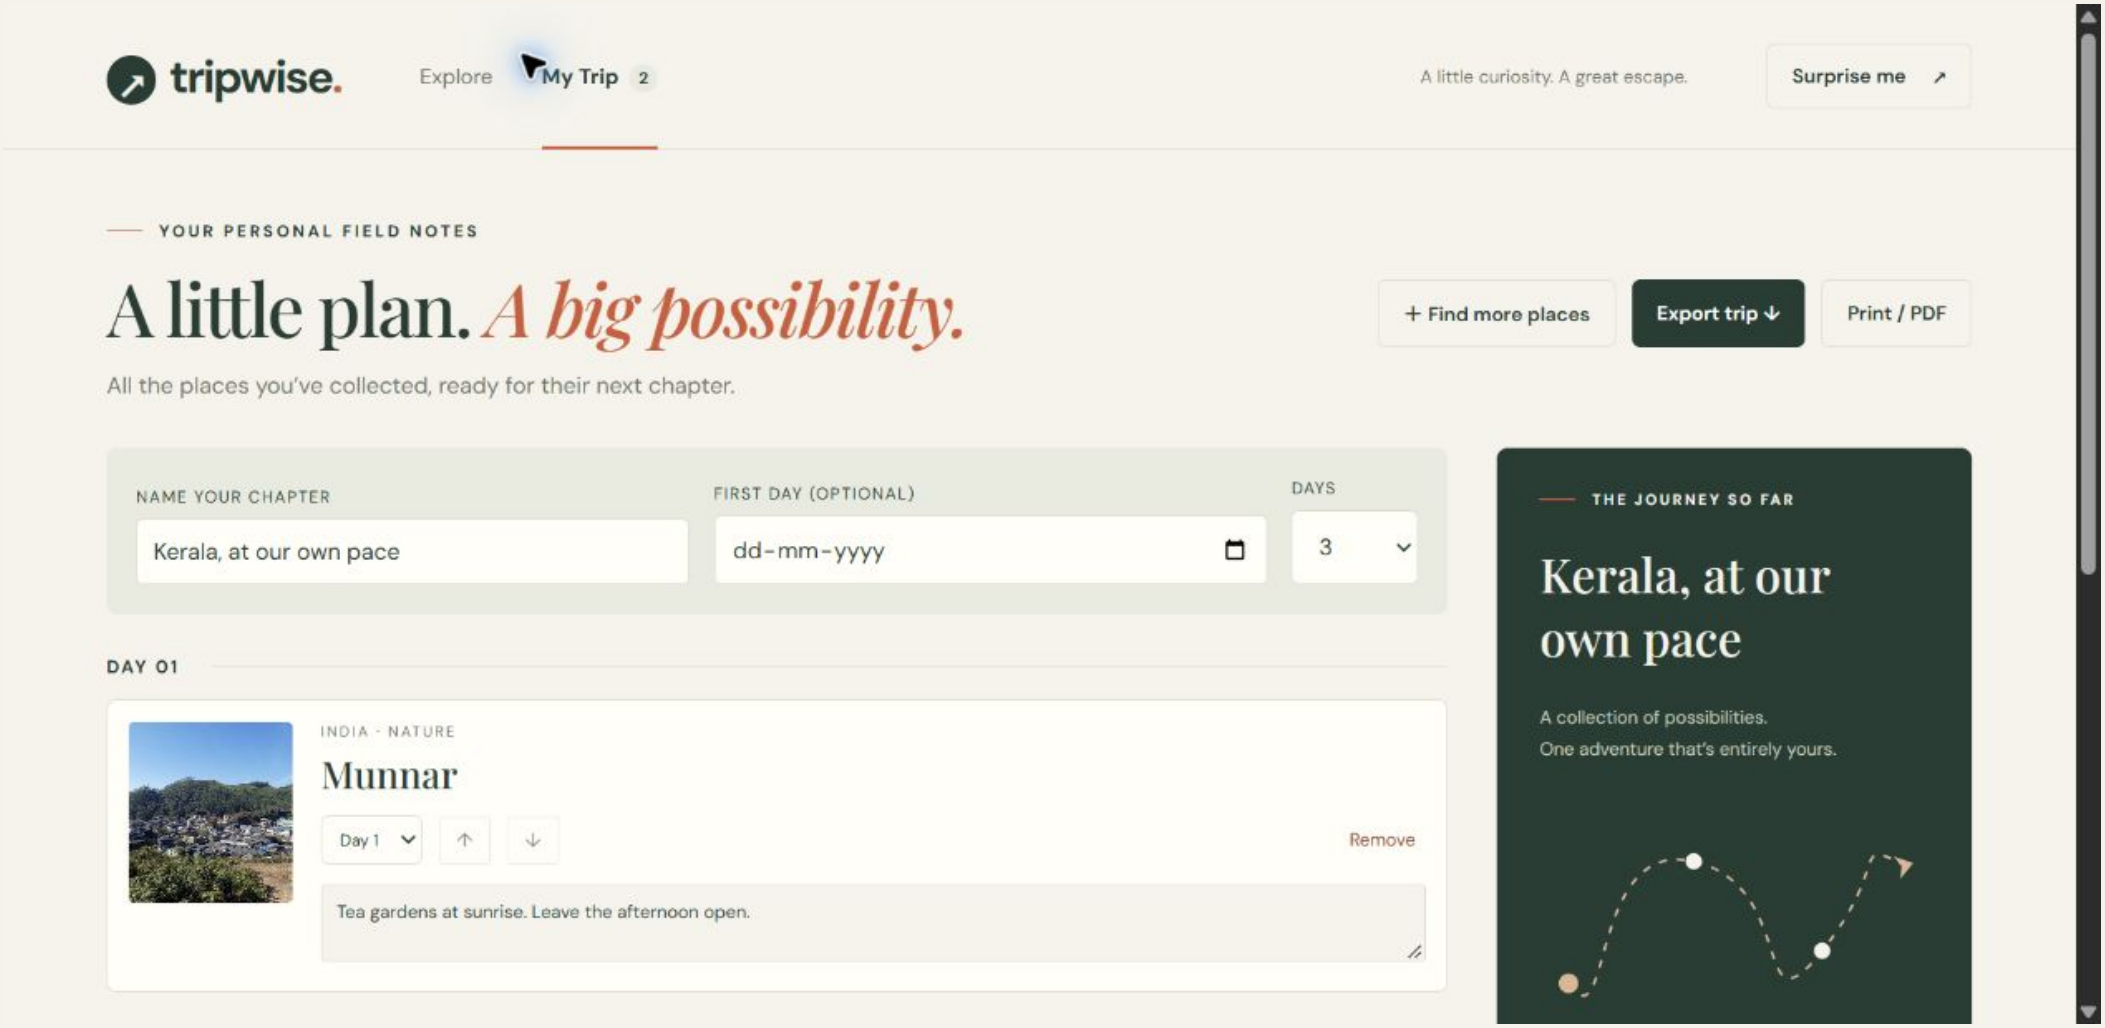

Destination details / desktop

Selected place description, category, location and editorial visit guidance.

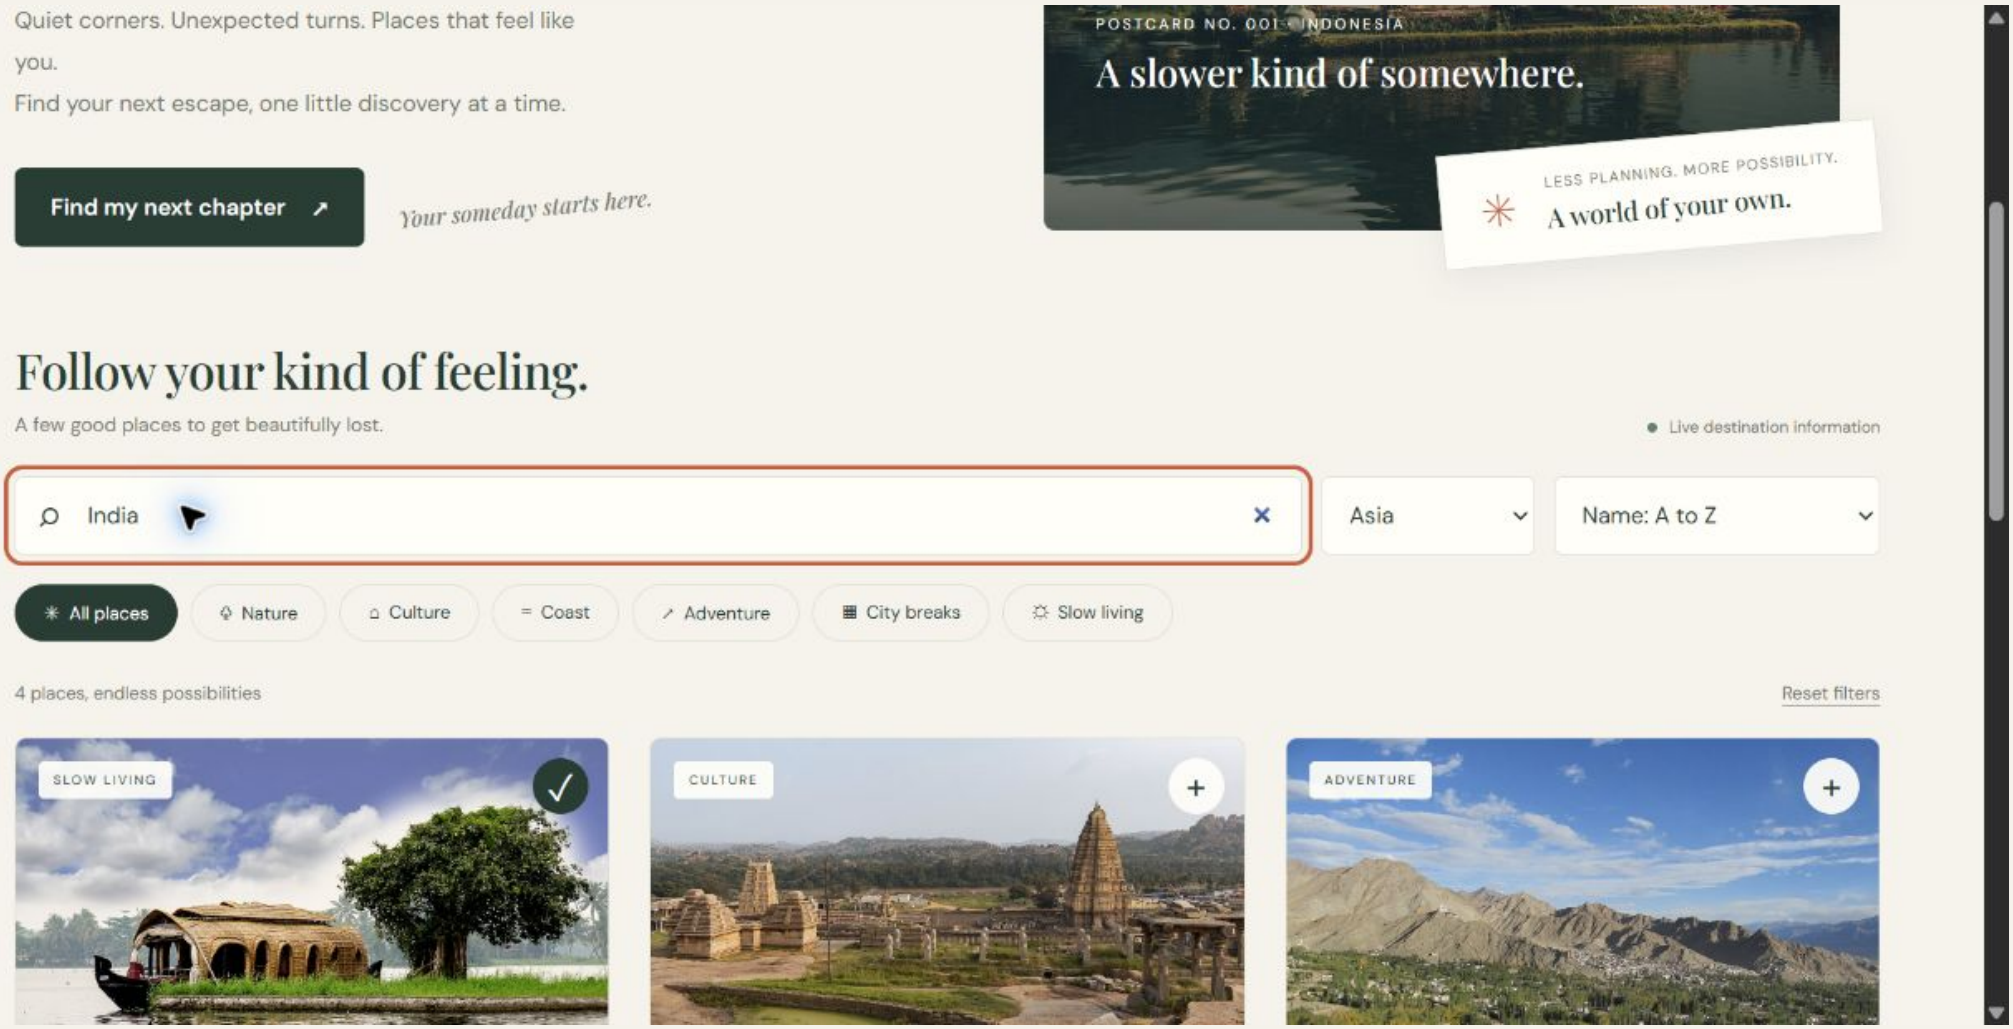

My Trip / desktop

Saved itinerary with day assignments, notes, reordering and export.

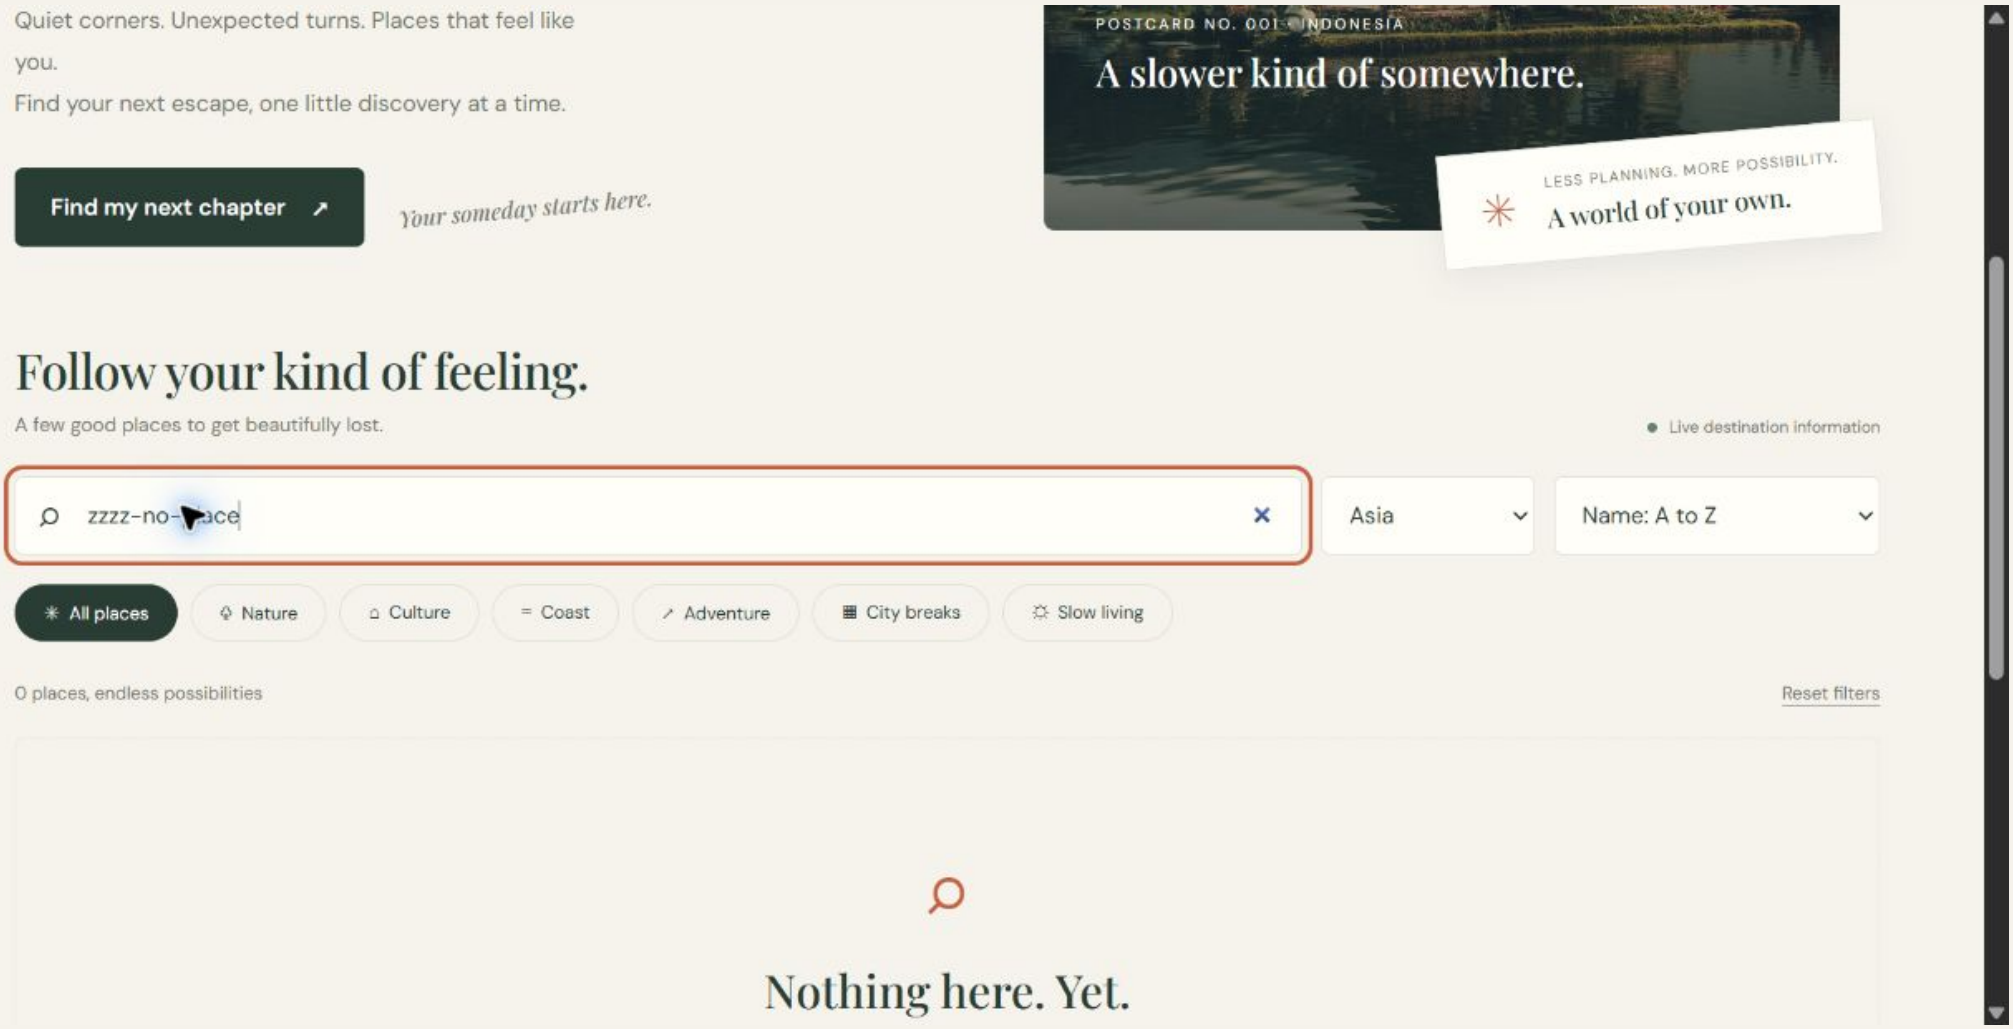

Search, filter and sort

India search + Asia region + alphabetical sorting work together.

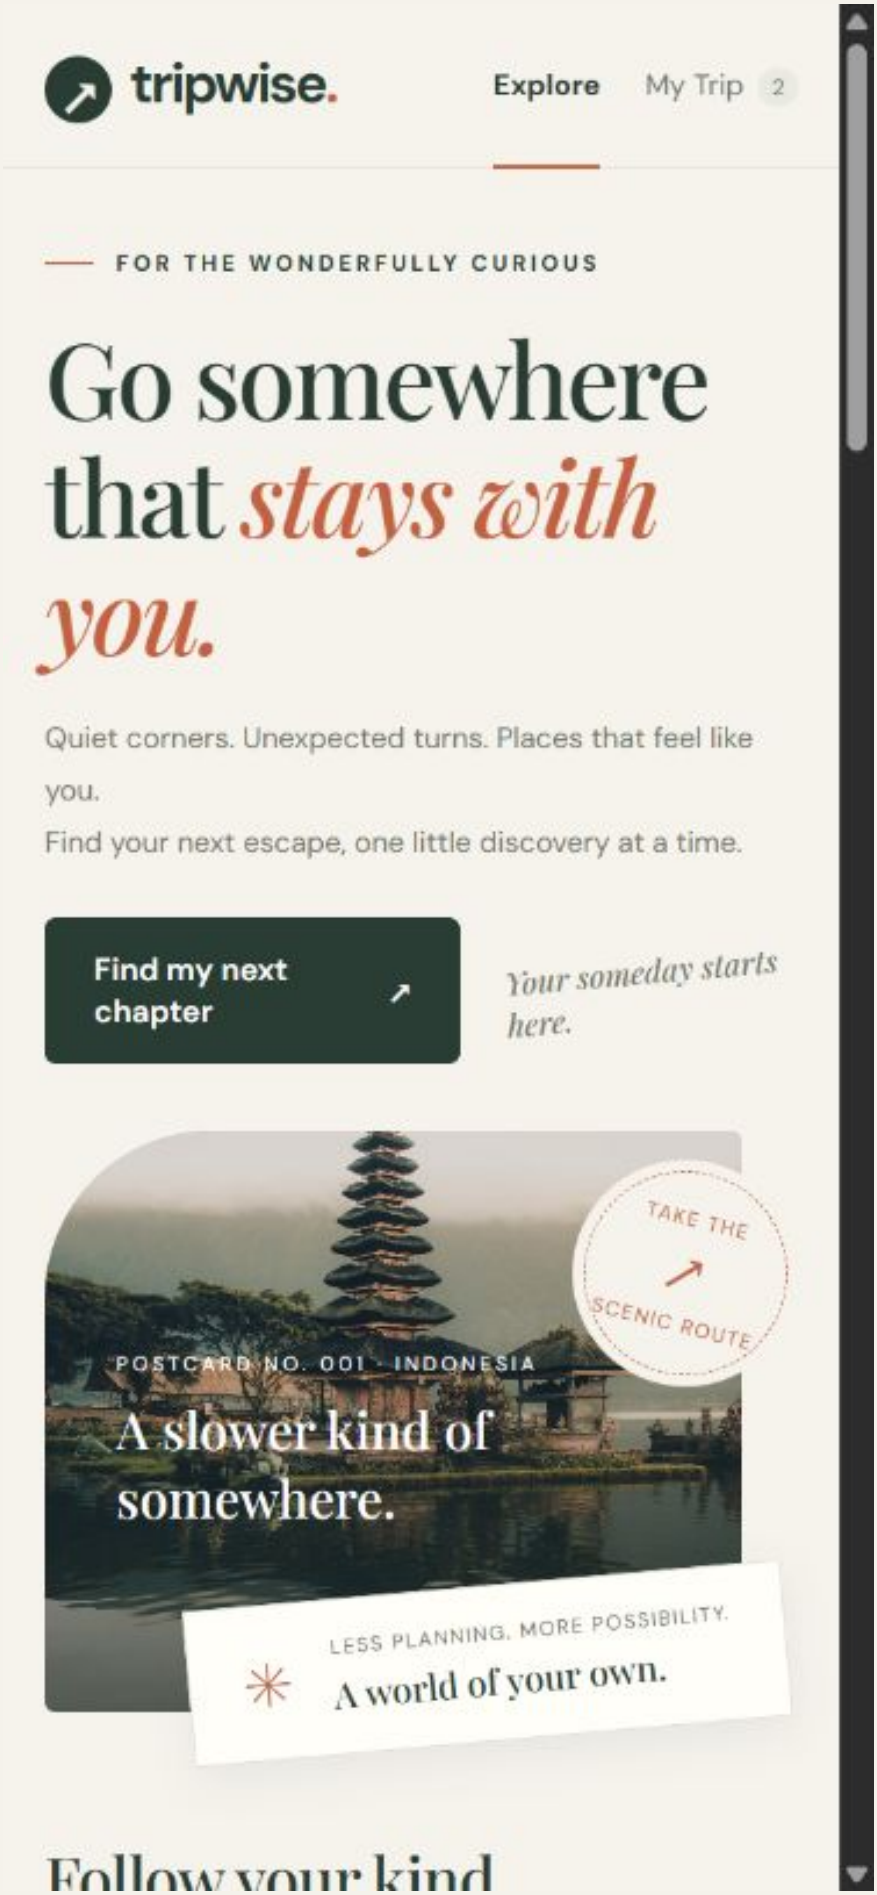

Empty search results

Clear feedback and an action to recover from a search with no matches.

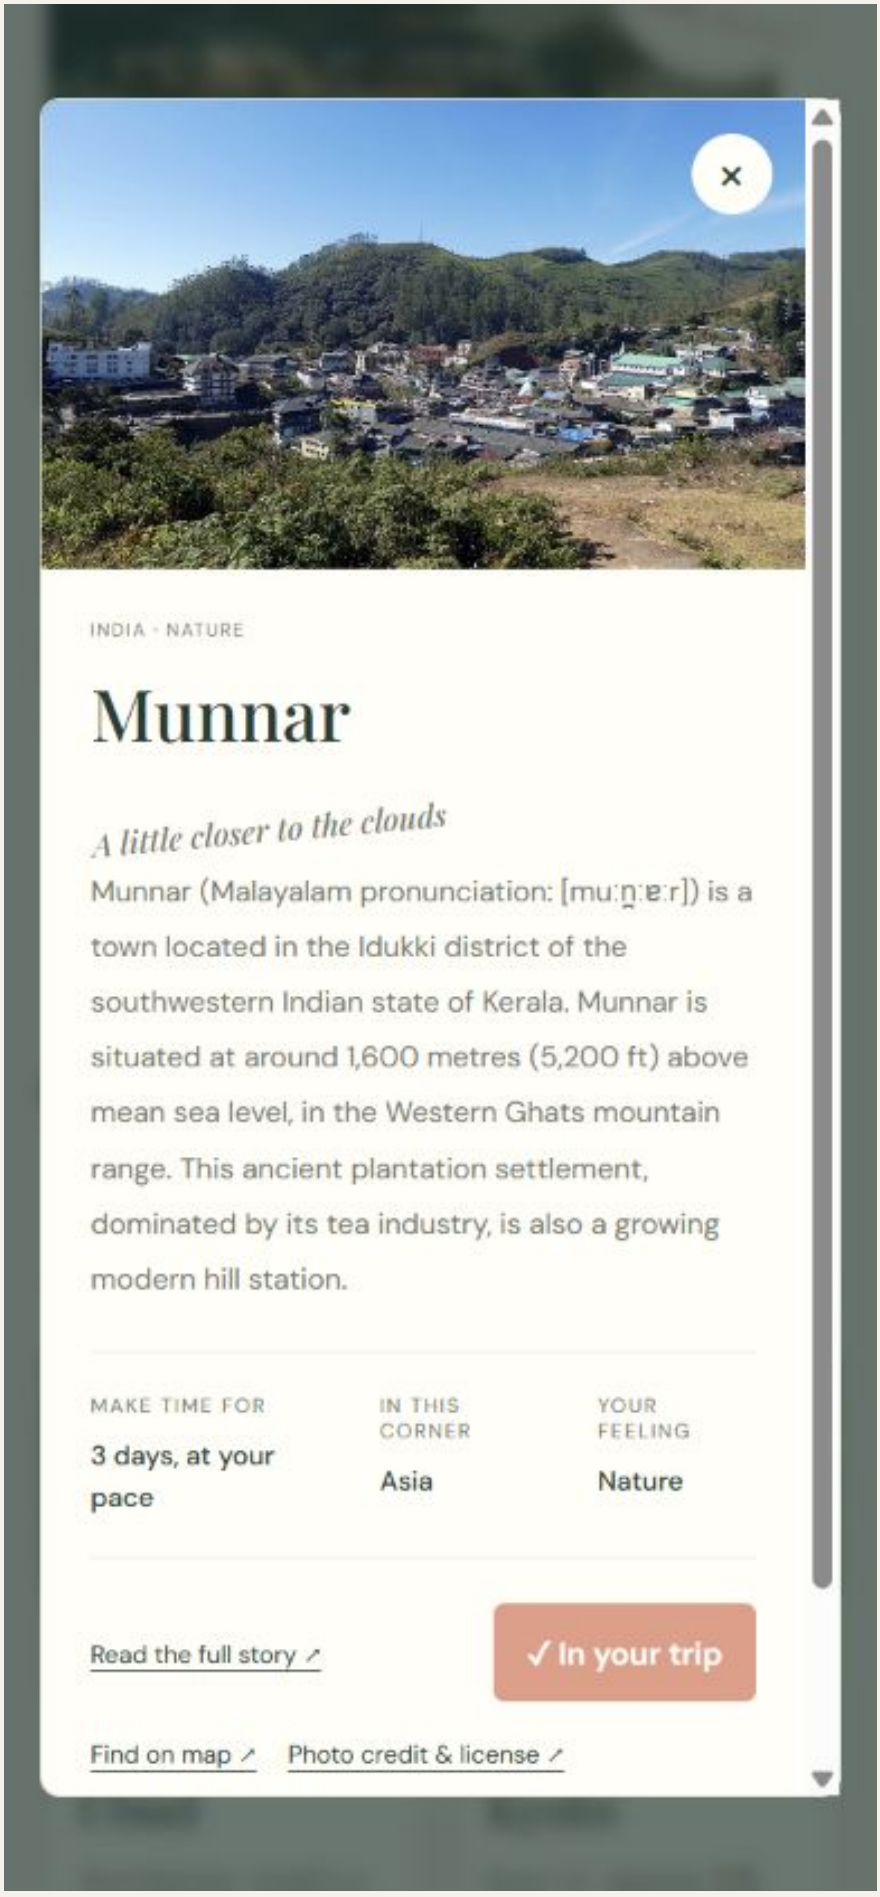

Explore / mobile

Responsive navigation, typography and postcard layout at a 390px viewport.

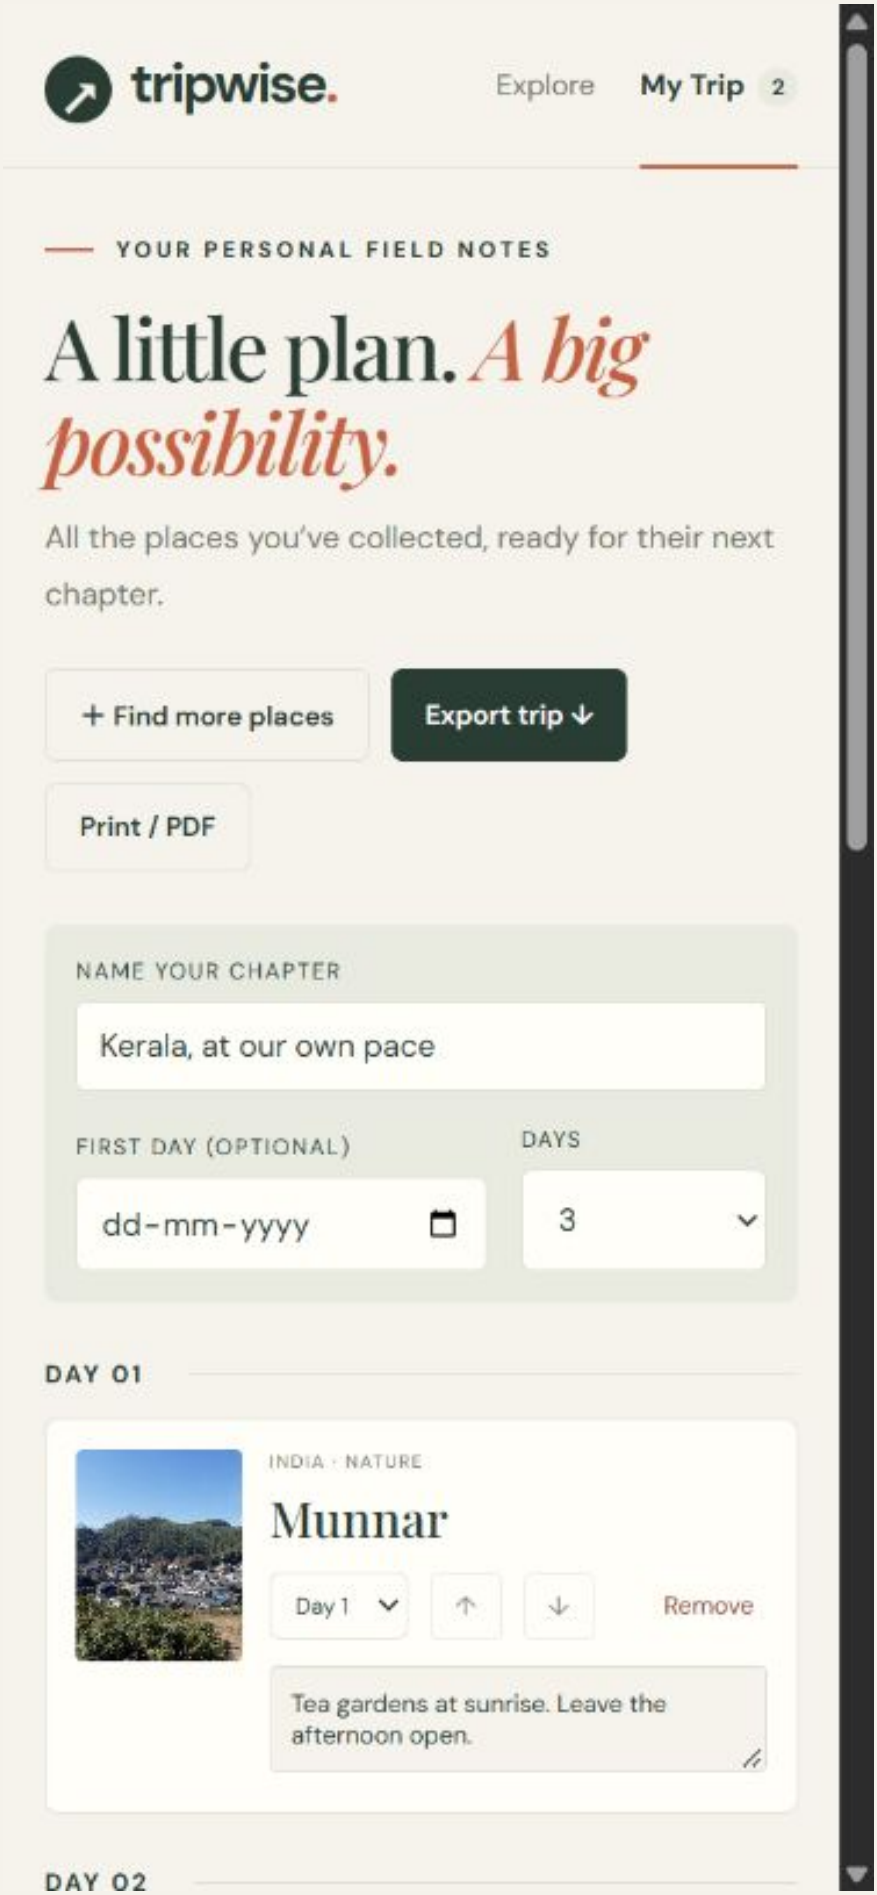

Destination details / mobile

Scrollable native dialog with keyboard focus management and Escape dismissal.

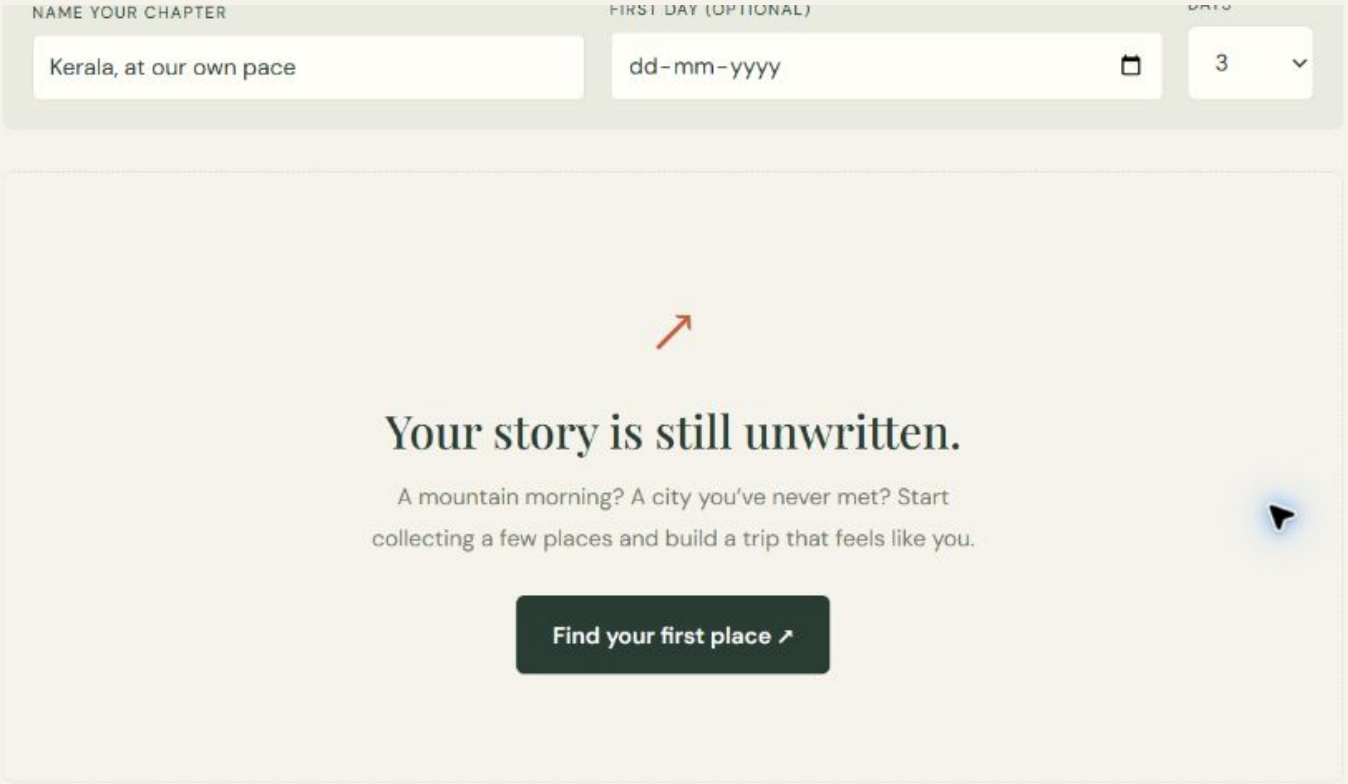

My Trip / mobile

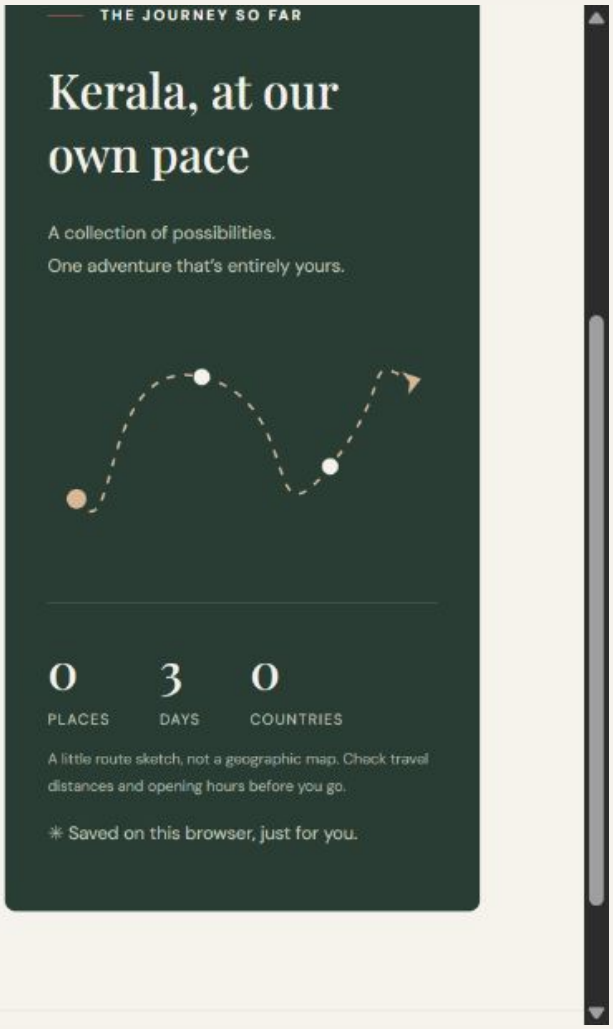

A responsive day-by-day itinerary with editable personal notes.

Empty itinerary

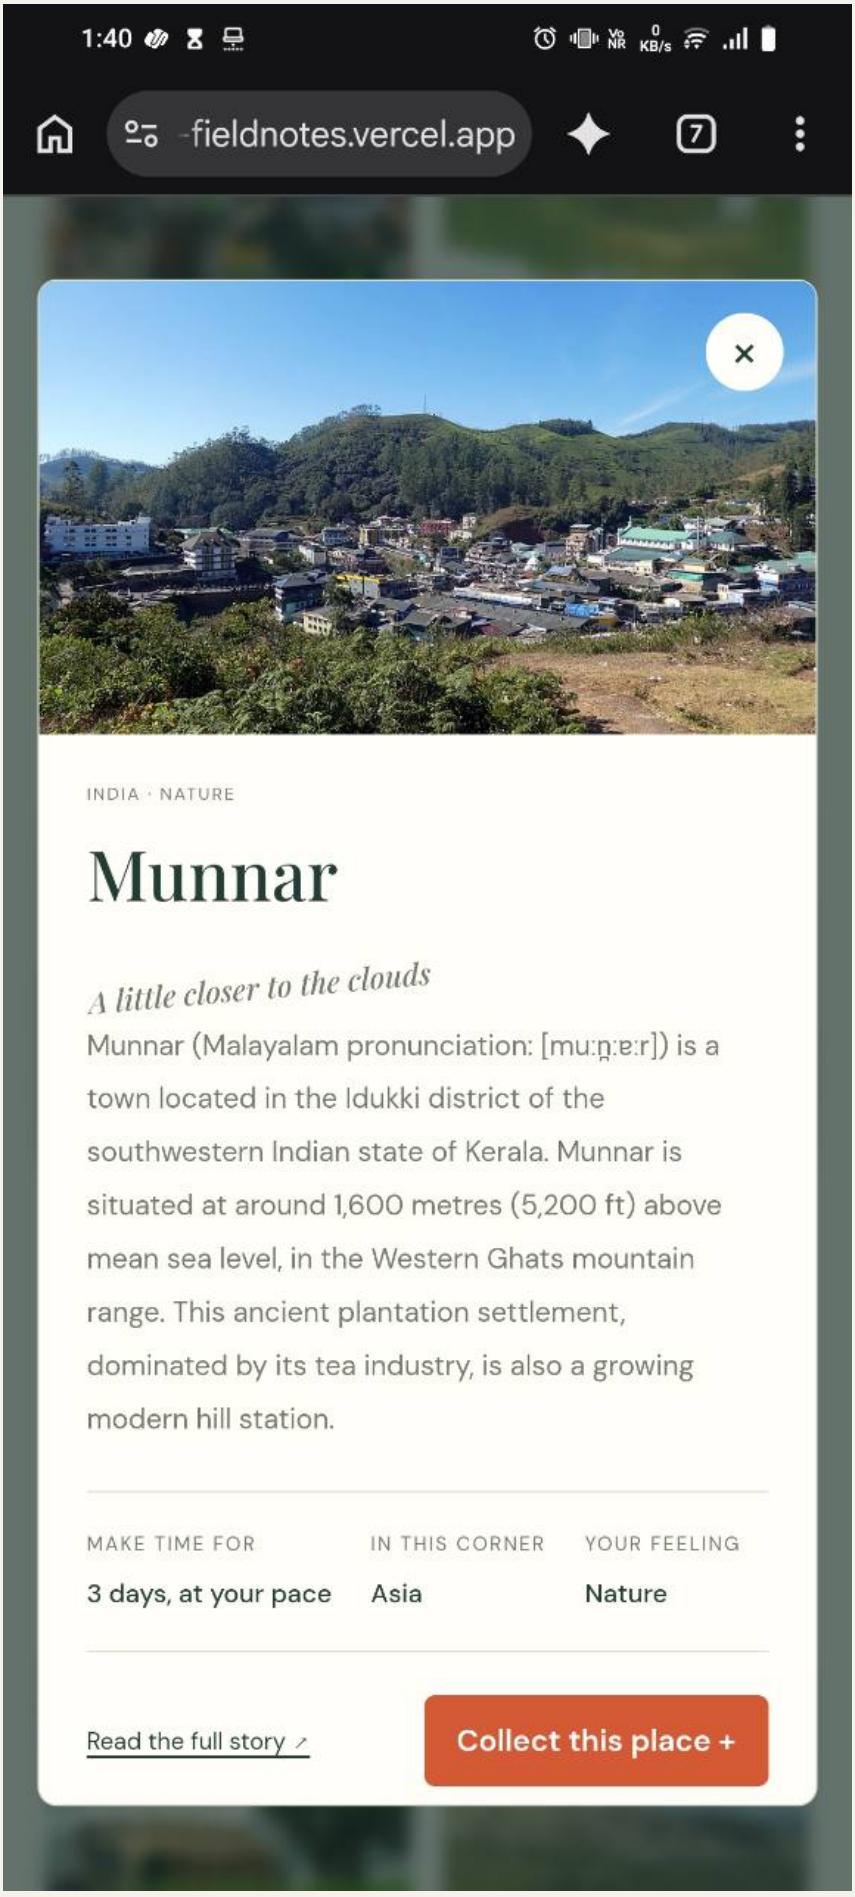

A useful first-run state that guides the user back to destination discovery.

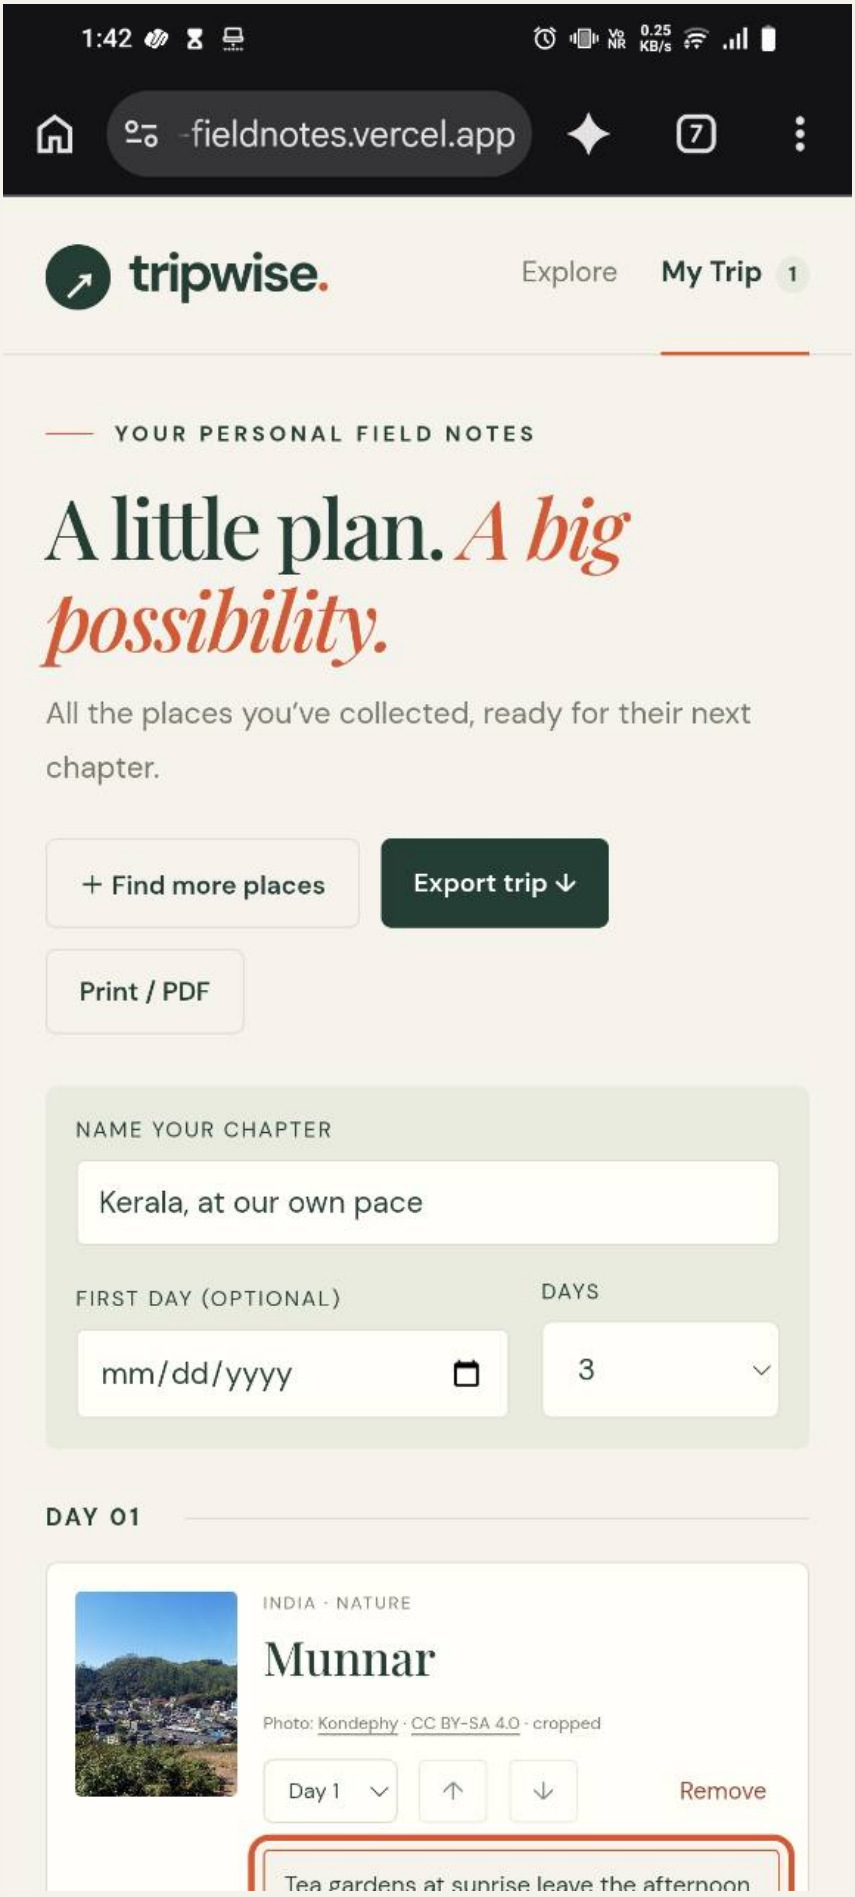

Destination details / phone
